Node js Modules

#module → code को devide करना

#1 common JS (Tradition JS)

↓

old

#1 ES module system

↓

new

CommonJS

= require (filename) → use

module.exports = {...}

ES modules →

- import → use करने के लिए
- export → usable बनाने के लिए

node.js

Package.json → { "type" : "module" }

CommonJS

require()

module.exports = {—}

→ Traditional Node.js module System

→ older node.js projects

ES module

import

export {—}

→ modern JS module system.

→ modern projects.
