Lecture 2

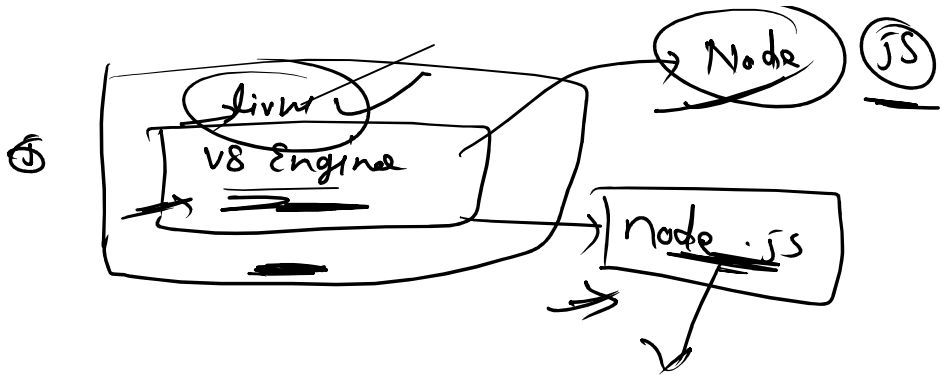

12 October 2026 01:07

Node.js and vs code Setup

Lecture Goals

1. What is Node.js?
2. JavaScript vs Node.js
3. Why Node.js for Backend Development?
4. Node.js Installation
5. Checking Node.js and npm Installation
6. VS Code Setup
7. Creating the First Node.js File
8. Running the First Node.js Program

Server
JS code outside the browser run

JS Easily run

Javascript	node.js
→ Programming language	→ Runtime environment
→ Browser	→ Outside the browser, server
→ Frontend development	→ Backend development
→ Browser ke through execute	→ Node.js runtime ke through execute

Why Node.js for Backend →

→ one language for Frontend & Backend
→ fast
→ Real time communication ✓ ***

Node.js

→ web servers

→ Rest APIs

→ Backend application.

→ Authentication system

→ Database Applic—

Node.js Installation →

offi—

→ node -v → version

npm → node packager manager

node.js → default

→ ~~noo~~ npm install express

→ npm -v

vs code →

official

create First Node.js file
