→

Node Architecture ✓

Upar — ढांचा

✓ ① V8 Engine →

c/c++ (ii) libuv ✓

(iii) Eventloop

sync

V8 Engine ✓ → Normal JS code ✓

Google ✓ → JS code executes ✓

✓ Chrome → Engine → V8

human langu → console.log ("Hello")

↓

machine code — V8

↓

(II) libuv – c/c++ library →

→ asynchronous I/O → Thread pool ⇅ callback

~~so~~ mechanism –

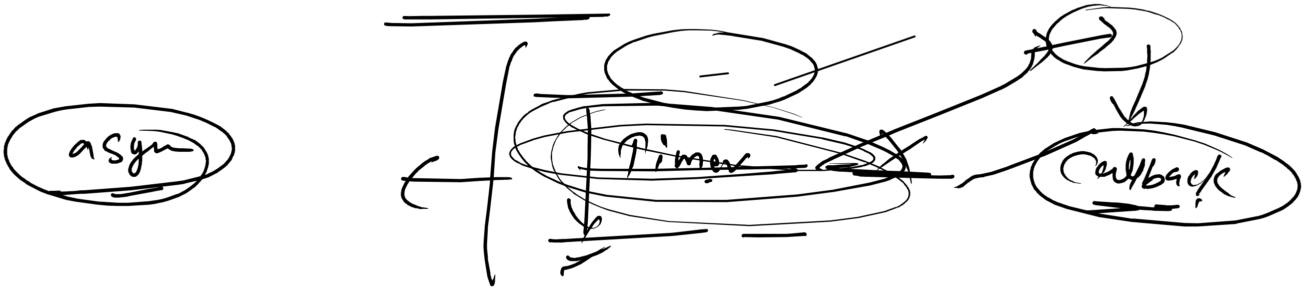
Ex → file system, DNS operations password hashing –

asynch –

(III) Event loop → callback ⟷ call stack

V8

execute –



V8 Engine → JS code execute –

libuv → a supporting –

Eventloop → cordinator –
